

ROYAL FORKLIFT (SUZHOU) CO., LTD.

Royal IC Forklift Introduction

Capacity 1500-4000kgs

Royal has focused on improving the comfort and safety for the R series forklift, with less vibration, lower noise level, more safety and detail attention design idea for the driver.

Working Efficiency

**20%
UP**

- ★ High Efficiency and Productivity
- ★ Outstanding Visibility
- ★ Comfort and Ergonomics
- ★ Humanized Design
- ★ Easily Maintenance and Serviced
- ★ Safety and Stability
- ★ Professional Key Components

The small-diameter steering wheel with the full hydraulic power steering system provides excellent maneuverability.

Convenient adjustable steering wheel with big angle, adapting to different operators.

The large assist grip, low step make getting on and off more smooth. This can help reduce the operator's fatigue.

The foot operation space be enlarged by 20% to provide operator with comfortable feeling.

Upward Visibility

Press forming overhead guard provides stronger protection and good upward visibility

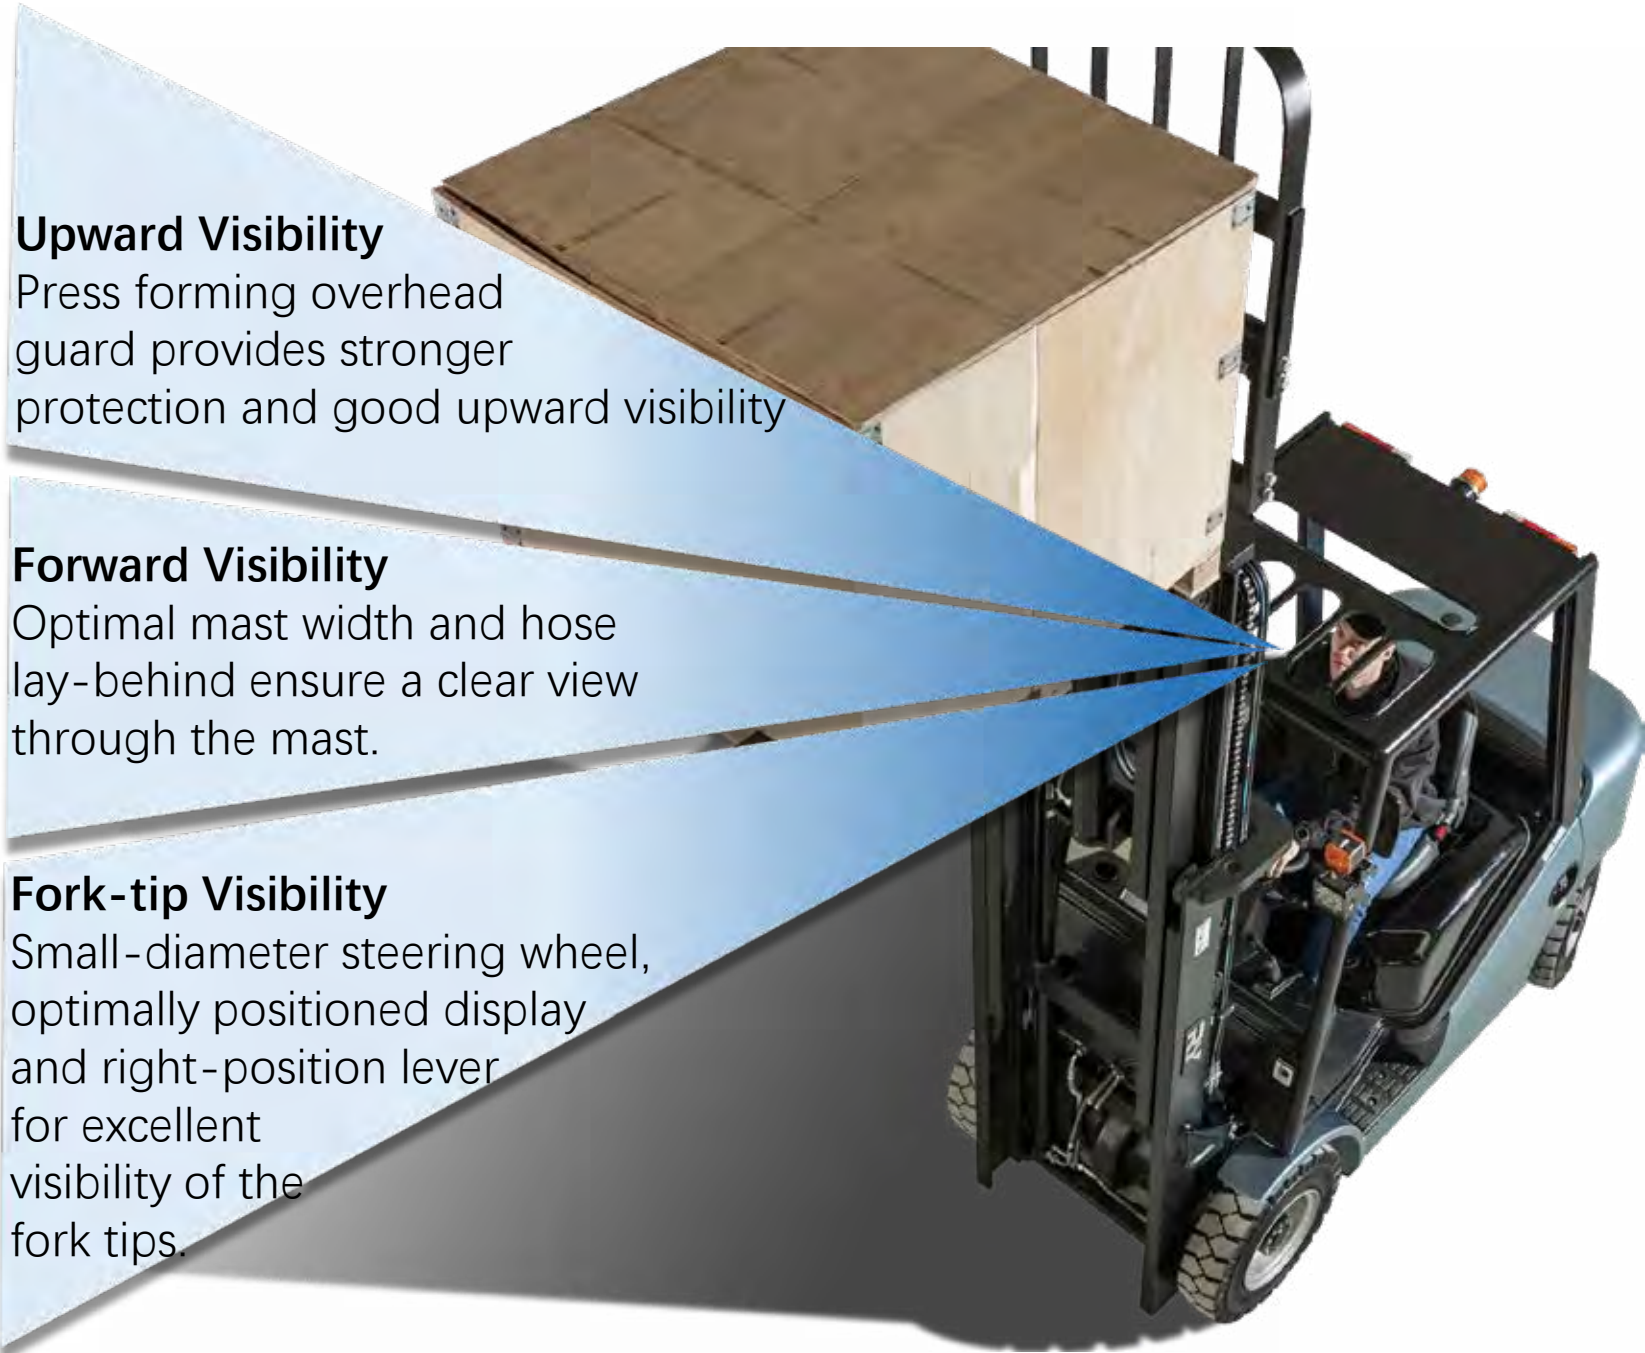

Forward Visibility

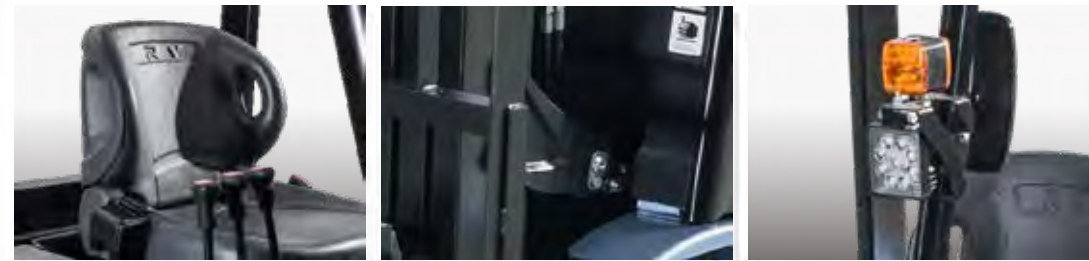

Optimal mast width and hose lay-behind ensure a clear view through the mast.

Fork-tip Visibility

Small-diameter steering wheel, optimally positioned display and right-position lever for excellent visibility of the fork tips.

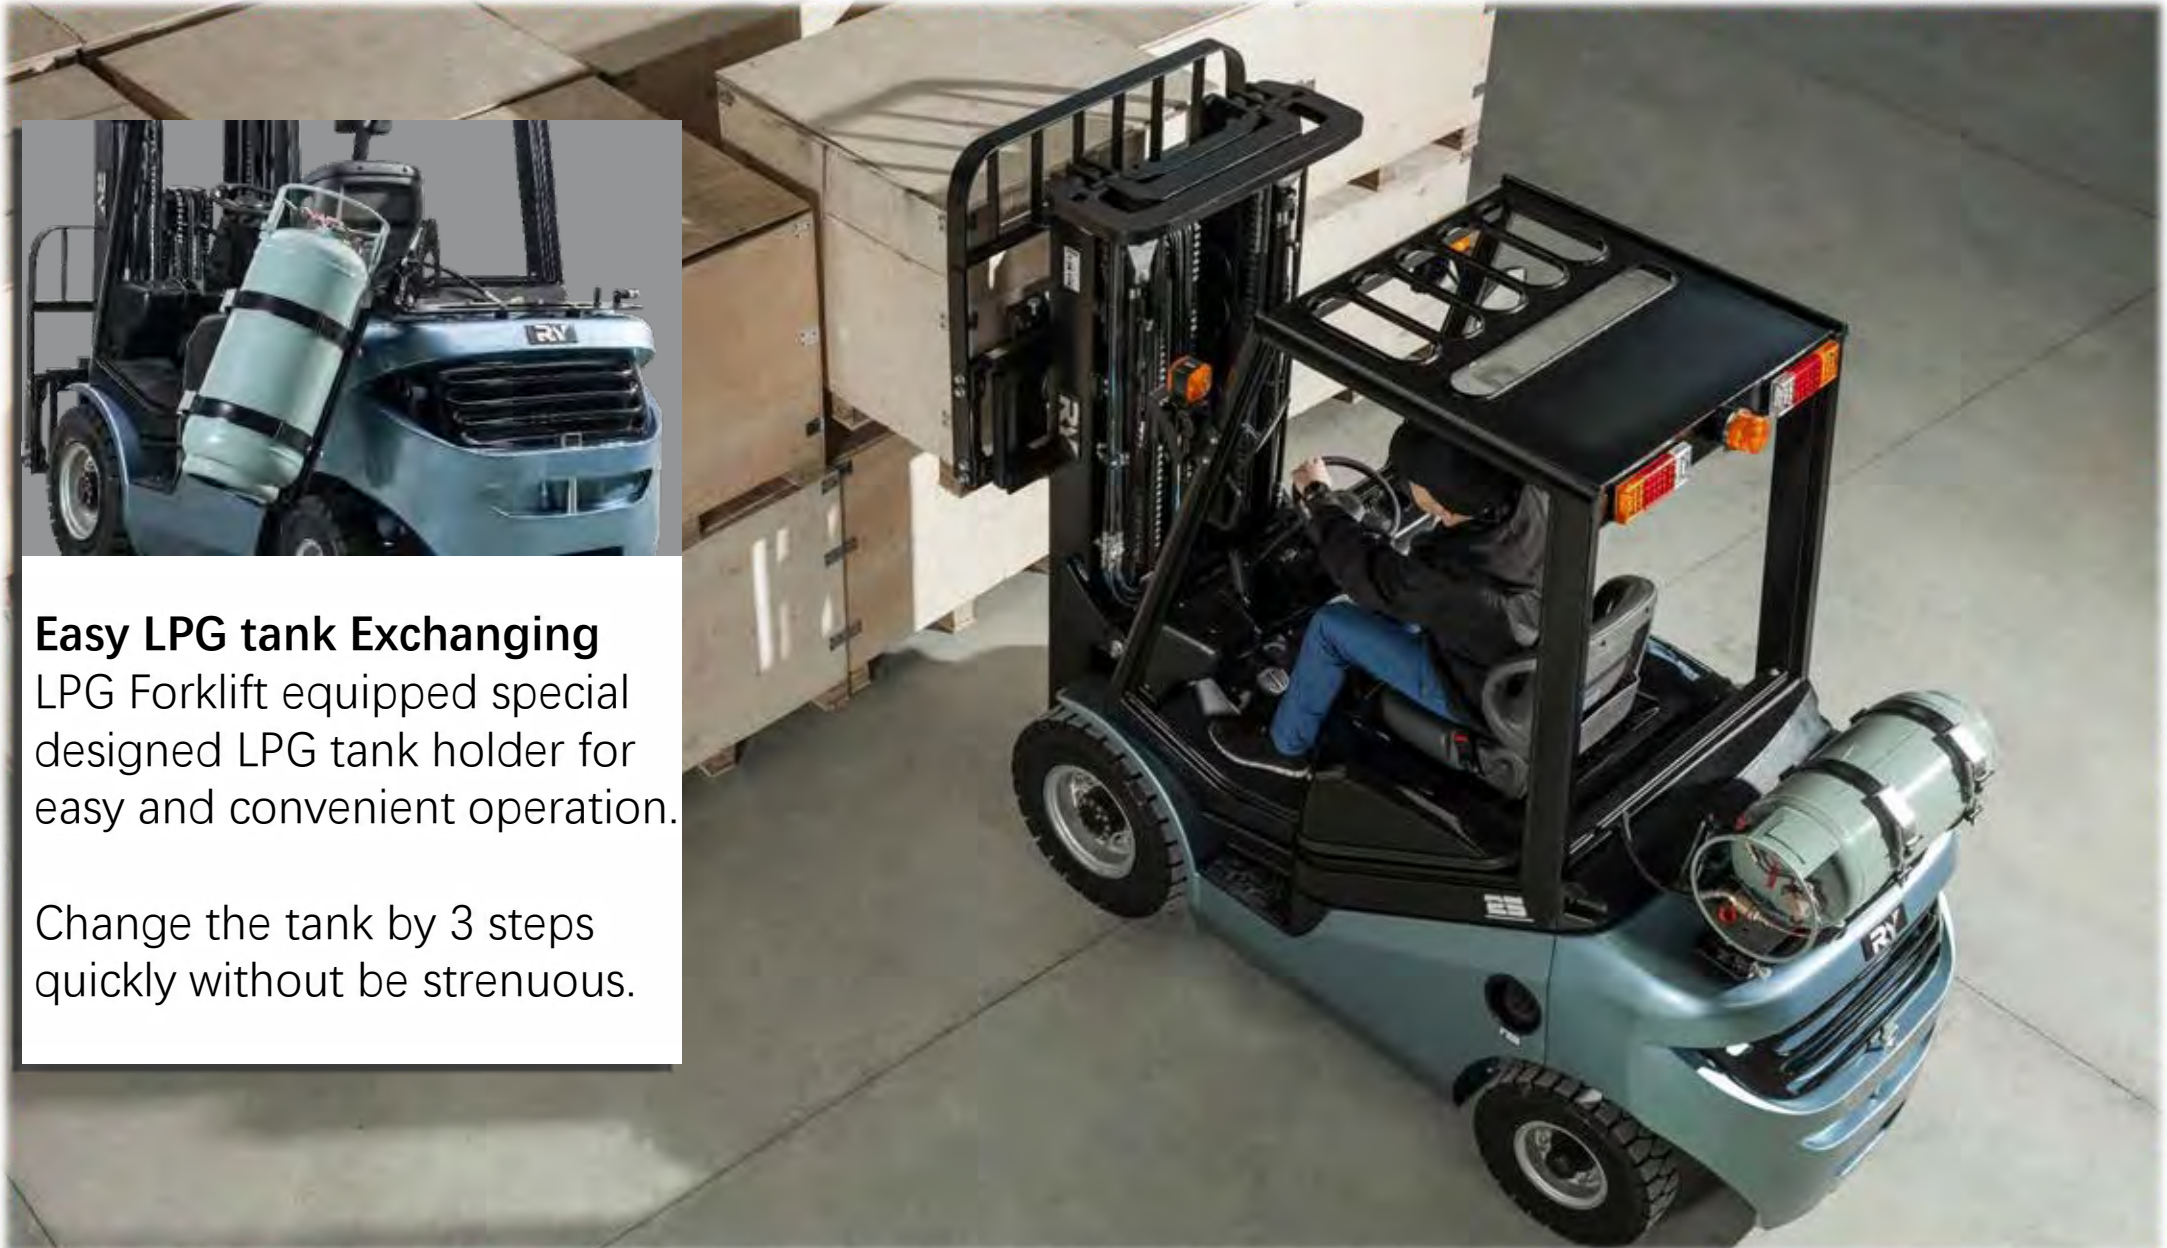

- The multifunction Display offers useful information for operators and managers.
- Adjustable seat with right positioned control lever, reduce the operation fatigue.
- Energy Savings, Long Life LED Lights offer long life and low energy consumption.
- Hand parking brake device with button greatly reduces fatigue in operation, lighter and safer.
- Internal cylinder design for dust-proof and avoid of potential damage

Easy LPG tank Exchanging

LPG Forklift equipped special designed LPG tank holder for easy and convenient operation.

Change the tank by 3 steps quickly without be strenuous.

Designed larger space and compact wire distribution, it's convenient to have big checking and maintenance.

Auxiliary radiator and waterproof fuse box with clear function indication are standard for each IC forklift.

Safety and Stability

Suspension pedals provide extra foot space helps significantly reduce the driver's fatigue and vibration from transmission, increases operation comfort

Full floating safeguard system and greatly improving the frame vibration and noise. High strength roof enhances the forklift reliability and safety

Special muffler and new noise isolation material, reducing noise level by more than 4DB

Imported engine:
ISUZU / YANMAR / GCT / MITSUBISHI /
CUMMINS / PERKINS/ PSI /GM / DEUTZ

Transmission:
ZHONGNAN / ZHONGCHAI

Hydraulic system:
SHIMADZU pump and valve / NOK seal
kits / GATES hoses

Attachment:
CASCADE / LDSJ

Royal are trying from forklift products assembly in primary stage extending to upstream markets, through core components self-production, acquiring or holding key component suppliers to reduce production cost, ensure products quality and achieve technology leading.
